OBJECTIVE

Hello! Waleed here, a web enthusiast passionate about turning creative ideas into user-friendly online experiences. As a digital craftsman, I find joy in taking on challenges and pushing myself to create something extraordinary. Passionate about Laravel.

I'm pushing my expertise to new heights while currently learning Vue.js to enhance my skill set, enhancing applications and providing users with an outstanding experience.

Let's connect and explore opportunities to build something amazing together!

EXPERIENCE

Laravel Developer at UZAIR TECHNOLOGY:

(FEB 2023 – PRESENT)

- At Uzair Technology, my main work is to create great and efficient web solutions.
- I focus very closely on details so the code will be at its finest quality.
- Dive across the Laravel framework to create web developments that exceed expectations.
- However, other times, I prefer to bring innovation and reliability, along with me into our projects.

Projects:

- **ALL CARS** - A Laravel website that shows the bidding history of cars for auction from the USA, Canada, and ZEA. The system processes thousands of LOTs and VINs daily to provide prices, build year, damage, mileage, and auction information. Designed safe payments by integrated stripe.
- **AI CoverGen** - (Laravel + Livewire + TailwindCSS) AI Cover Voice Generating Website in which I integrated Stripe for secure payments, job scheduling for automated tasks, and AWS for file storage & uploads.
- **Shigoo Laundry App** - A Multi-vendor's Laundry Service Platform. Build REST APIs for Mobile App and Admin Dashboard of Super Admin in Laravel Livewire. This system integrates effectively with order management, delivery tracking, and vendor coordination.

FYP PROJECT

TechTrack Advisor

- Created TechTrack Advisor to help beginners who are often bewildered to choose a career in the tech industry. I used Gemini API for generating roadmaps and an AI model for personal suggestions about careers in Pakistan, this custom tech career GPS helps newcomers to navigate in the ever-evolving tech industry to succeed.
- Tech stack: Laravel, Livewire, Blade, Tailwind CSS

EDUCATION

BSCS @ KOHAT UNIVERSITY OF SCIENCE & TECHNOLOGY

(2020 – 2024)
